

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + Refrain from automated querying Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at http://books.google.com/

[.] Additional Ships are inserted in the Supplement at the end of the Register.

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the satisfaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The Date of Survey of a Ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving Notice of Periodical Surveys required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.

*. Additional Ships are inserted in the Supplement at the end of the Register.

M.B.—All vessels assigned a character in the Register Book are required, under the Bules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the estisfaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The Date of Survey of a Ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving Notice of Periodical Surveys required by the Rules, or when repairs are necessary in consequence of damage or from other causes, rests with the Owners, Masters, or Agents.

^{• . *} Additional Ships are inserted in the Supplement at the end of the Register.

N.B.—All v-ssels assigned a character in the Register Book are required, under the Rules of the Seciety, to be submitted to Surveys by the Society's Surveys periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried entunder the inspection and to the satisfaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The Date of Survey of a Ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to preven the disappointment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving Notice of Periodical Surveys required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.

^{*.*} Additional Ships are inserted in the Supplement at the end of the Register.

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the satisfaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The Date of Survey of a Ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving Notice of Periodical Surveys required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.

[.] Additional Ships are inserted in the Supplement at the end of the Register.

M.B.—All vessels assigned a character in the Register Book are required, under the Bulss of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the estifaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The Date of Servey of a Ship only certifies to its efficiency at that time

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their characters from want of Survey at is hereby intimated that the duty of giving Notice of Periodical Surveys required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.

^{*.*} Additional Ships are inserted in the Supplement at the end of the Register.

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the satisfaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The Date of Survey of a Ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving Notice of Periodical Surveys required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.

[.] Additional Ships are inserted in the Supplement at the end of the Register.

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyor periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or maskins required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried a under the inspection and to the estifaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Seciety must surveyed by one of the Society's Surveyors at the earliest opportunity.

The Date of Survey of a Ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving Notice of Periodical Surveys required by the Rules, or when repairs are necessary in consequence of demages, or from other causes, rests with the Owners, Masters, or Agents.

[&]quot;. "Additional Ships are inserted in the Supplement at the end of the Register.

M.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveysem periodically (samually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of chips or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection end to the estimated of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The Date of Survey of a Ship only certifies to its efficiency at that time.

In reference to the Eules of the Scolety, and in order to prevent the disappointment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving Notice of Periodical Survey required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.

^{*. *} Additional Ships are inserted in the Supplement at the end of the Register.

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being even that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters satigned to them in the Register Book, must be carried out under the inspection end to the estimation of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be curveyed by one of the Society's Surveyors at the earliest opportunity.

The Date of Survey of a Ship only certifies to its efficiency at that time.

In reference to the Rules of the Scolety, and in order to proven the disappointment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving Notice of Periodical Surveys required by the Rules, or when repairs are necessary in consequence of damage, or from other censes, rests with the Owners, Mastern, or Agents.

Additional Ships are inserted in the Supplement at the end of the Register.

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the estisfaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The Date of Survey of a Ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving Notice of Periodical Surveys required by the Rules, or when repairs are necessary in consequence of damage, or from other consess, rests with the Owners, Masters, or Agents.

LLOYD'S REGISTER. NAVIRES A VOILES.

[.] Additional Ships are inserted in the Supplement at the end of the Register.

M.B.—All vessels assigned a character in the Register Book are required, under the Bules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the estisfaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The Date of Survey of a Ship only certifies to its efficiency at that time.

In reference to the Rules of the Scolety, and in order to prevent the disappointment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving Netice of Periodical Surveys required by the Rules, or when repairs are necessary in consequence of damage, or from other casess, rests with the Owners, Masters, or Agents.

[&]quot;." Additional Ships are inserted in the Supplement at the end of the Register.

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the satisfaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The Pate of Survey of a Ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving Notice of Periodical Surveys required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.

... Additional Ships are inserted in the Supplement at the end of the Register.

M.S.—All vessels assigned a character in the Register Book are required, under the Bules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the estifaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The Date of Survey of a Ship only carrifles to its efficiency at that time.

In reference to the Rules of the Scolety, and in order to provent the disappointment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving Notice of Periodical Surveys required by the Rules, or when repairs are necessary in consequence of damage, or from other consess, rosts with the Owners, Masters, or Agents.

Our

(or Wilheldre) 1880om

^{..} Additional Ships are inserted in the Supplement at the end of the Register.

If R.—All venues assigned a character in the Register Such are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practically), in order to its being even that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at purts where there is a Surveyor to this Society must be carried out under the inspection and to the satisfaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Sunicely's Surveyors at the satisfact opportunity.

The Date of Survey of a Ship only certifies to its efficiency at that these.

In reference to the Rules of the Suciety, and its order to prevent the Stappaintment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving Notes of Periodical Surveyo required by the Rules, or when repairs are necessary in consequence of damage, or from other source, sente with the Owners, Machine, or Agents.

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the estimation of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be carried out under the inspection and to the satisfaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be carried out.

The Date of Survey of a Ship only certifies to its efficiency at that time.

In reference to the Bules of the Scolety, and in order to prevent the disappointment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving Notes of Periodical Surveys required by the Bules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.

[.] Additional Ships are inserted in the Supplement at the end of the Register.

H.B.—All vessels assigned a character in the Register Book are required, under the Bules of the Seciety, to be submitted to Surveye by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the satisfactation of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the carliest opportunity.

The Date of Survey of a Ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their characters from want of Survey, it is harely intimated that the duty of giving Notice of Periodical Surveys required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.

^{*, *}Additional Ships are inserted in the Supplement at the end of the Register.

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Seciety, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to the being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the imposition and to the satisfaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The Date of Survey of a Skip only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships lesing their characters from want of Survey, it is hereby intimated that the duty of giving Notice of Periodical Surveys required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.

H.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters sestigned to them in the Register Book, must be carried out under the inspection and to the satisfaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The Date of Survey of a Ship only certifies to its efficiency at that time.

 $^{\bullet},^{\bullet}$  Additional Ships are inserted in the Supplement at the end of the Register.

In reference to the Rules of the Scolety, and in order to prevent the disappointment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving Notice of Periodical Surveys required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.

#### KEY TO ABBREVIATIONS—continued.

#### DOUBLE BOTTOMS AND WATER BALLAST TANKS.

ILLUSTRATIONS OF NOTATIONS in the 11th, 12th, 18th, and 14th Columns OF THE REGISTER BOOK.

WB = DB100'180t: denoting Double Bottom 100 feet long; corpacity, 180 tons.

WB = DBa100/180'310t: denoting Double Bottom, aft 100 feet, forward 180 feet long; total capacity 810 tons.

WB — DBa72' JuE4 B25'280t : denoting Double Bottom aft 73 fast long, and under Engines and Botlere 28 fest long : total capacity, 260 tens.

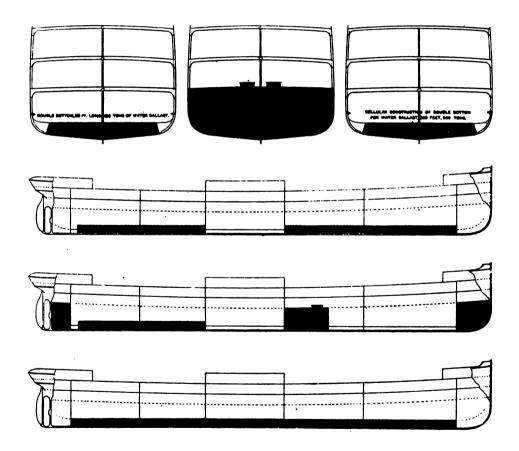

WB = Coll DB800'550t: denoting collular construction of Double Bottom 800 feet long; capacity, 550 tans.

WB - FPT20t: denoting Fore Peak Tank; copacity, 20 tens.

WB - APTSt: denoting After Peak Tunk; copacity 8 tens.

WB = MT36/1808: denoting Midship deep Tunk, 25 feet long; capacity, 180 tens.

WB = DTu36'165t/30'198t: denoting Deep Tunk aft 26 feet long, capacity, 165 tens; and forward 30 feet long, capacity, 196 tens. See Diagrams.

When part of the record of Water Ballast is superaged in red inh, thus :- WB-DBall/fix pullphote, fo., it signifies that the Vessel is fitted with tanks to the extent named, but at the date of the last survey the supunged portion was not being used for the purpose of Water Ballant, and the pipes, fo., thereto have been

A List of Surveying Ports will be found at page xxxii

Test date of Burvey. The figures under a character denote the date when the vessel was last surveyed. The date of survey only certifies to the vessel's state of efficiency at that hims.

Ports of Burvey.

An explanation of contractions used to indicate surveying ports will be found on page xxxii.

The 6th, 7th, and 8th columns (Sailing Vessels), or 5th, 6th, and 7th columns (Steamers) left blank, indicate that the vessel has never been classed in the Register Book.

When the 6th (Sailing Vessels) or 5th (Steamers) column is left blank, except as regards the date of survey last recorded, it indicates that the character has expired, or that it has been withdrawn either for want of survey or on account of non-payment of fees due in the case.

#### Steamers, column 8; Sailing Vessels, column 9.

Date of Build.

In the case of Iron and Steel vessels classed by Lloyd's Register, the last date of survey for first entry of classifi-cation is reckened as the date of build when such survey is cation is reckened as the date of build when such survey is completed within six months of the date of launching; but, when the first entry survey is not completed within that period, the date of build is reckened as aix months after the date of launching. In the case of classed Iron and Steel vessels launched prior to the 19th May, 1887, and also in the case of all chased Wood and Composite vessels. the date of launch is reckoned as the date of build. In the case of vessels not classed by Lloyd's Register, it is not possible to define in all cases whether the date of build is the date of launch or the date of completion.

Records such as 1844 occur in the case of some unclassed vessels. These denote that the vessel was originally built at the date indicated by the upper figures, and is reported to have been rebuilt at the date indicated by the lower figures. In such cases, the Society has no authoritative information as to the extent to which the reported rebuilding has been carried out (see special note at foot of this page). Rebuilding of vessels, when carried out under the inspection

and to the satisfaction of the Society's Surveyors, is recorded thus :-- "rebuilt 89."

#### Steamers, column 10; Sailing Vessels, column 12.

Owners.

In the case of vessels belonging to the United Kingdom, the name recorded in the Register Book is that of the Managing Owner, or of the firm in which the Managing Owner is a partner. When there is not a Managing Owner appointed, the name of the largest shareholder is recorded; and the name of the Manager of the yessel is also noted if desired. For colonial or foreign vessels, it is endeavoured to follow the same practice as for United Kingdom vessels; but obvious difficulties render it impossible to ensure that a person entered as Managing Owner is really a legal owner. He may therefore sometimes be only the *Manager* of a vessel as distinguished from the Managing *Owner*.

#### Steamers, column 11; Sailing Vessels, column 13.

Depth.

When two depths are recorded, thus:  $^{16.9}_{34.2}$  the upper figures denote the depth to main deck and the lower figures the depth to the upper deck. This practice is most frequently adopted in the cases of vessels which have a spar or awning deck.

Breetions. See illustrations of types of vessels, following page xl.

Water

Text Ballast. See explanations and illustrations on page xxxi of key.

Steamers, column 12; Sailing Vessels, column 14.

Ballast. See explanations and illustrations on page xxxi of key.

#### Steamers, column 13.

All contractions used in relation to Engines, Boilers, Furnaces, &c., are explained in the alphabetical key, see page xxviii.

Mominal (NP)

The formulæ from which the Nominal Horse Powers are Horse Power calculated are :-

In cases of vessels in which the particulars of boiler pressures and surfaces are known:—

$$NHP = \frac{P + 940}{1000} \left( \frac{D^2 \sqrt{6}}{100} + \frac{H}{16} \right)$$
 where the boiler pressure is below 160%.

$$=\frac{P+590}{1500}\left(\frac{D^{2}\sqrt{8}}{100}+\frac{\pi}{16}\right)$$
 where the boiler pressure is 160th or above.

If the boilers are fitted with Forced Draught or Induced Draught appliances, then  $\frac{H}{12}$  is taken instead of  $\frac{H}{15}$ 

In cases where particulars of the boiler pressures and heating surfaces are not known:—

NHP=
$$\frac{D^2\sqrt{6}}{100}$$
 for Triple and Quadruple Expansion Engines.

$$=\frac{D^2\sqrt{6}}{120}$$
 for Compound Engines.

$$=\frac{D^2\sqrt{8}}{180}$$
 for Simple Engines.

In the above Rules, D == diameter of L.P. Cylinder in inches.

E == Stroke in inches.

H == Heating surface in Equare feet.

P == Working pressure in D per square inch.

Registered This note shows that the horse power given is the nominal Horse Power horse power as recorded in the Official Register of the vessel.

ter Ballast. See explanations and illustrations on page xxxi of key.

#### Steamers, column 14; Sailing Vessels, column 15.

Moulded Depth.

The moulded depth of an Iron or Steel vessel is the per-pendicular depth taken from the top of the upper deck beam at side, at the middle of the length of the vessel, to the top of the keel and the bottom of the frame at the to the top of the sees and the bottom of the frame at the middle line. In the cases of spar and awning deck vessels, however, the depth is measured from the top of the main deck beams. In Wooden and Composite vessels the moulded depth is the perpendicular depth from the top of the upper deck beam at the side of the vessel amidships to the lower edge of the rabbet of the keel.

In Wooden and Composite vessels where the lower part of the midship transverse section is of a hollow character (as in cases where thick garboard strakes are fitted) the moulded depth is measured from the point where the line

of the flat of the bottom cuts the keel.

#### Steamers, column 15; Sailing Vessels, column 16.

For explanations of symbols used to denote the Registers in which a vessel is classed (if she is not classed in Lloyd's Register Book), see alphabetical key, page xxviii.

Board of Trade The note "till 6,00" indicates that the certificate Certificate. (expires at the date specified, June 1900.

Steamers, column 16; Sailing Vessels, column 17.

Mean Drafts. The figures in the columns represent the mean drafts corresponding to an immersion of 65, 70, 75, and 80 per cent. respectively, as assigned by the late Underwriters' Registry, but these drafts do not indicate approved load lines.

While the Committee take all means possible to obtain correct information concerning the Vessels entered in the Society's Register Book, it will be understood that in the case of Vessels not classed by the Society they cannot vouch for the complete accuracy of all the particulars given in respect of dates of metalling, tonnage, dimensions, decks, classification, &c.

### EXPLANATIONS OF RECORDS IN THE REGISTER BOOK.

(All abbreviations employed in the Register Book are explained in the alphabetical key, see page xxviii.)

Steamers, o	olumns 2 & 3; Sailing Vessels, columns 3 & 4.	A1
Master.	The figures which follow the master's name, thus, Smith 86-97, indicate the dates of his appointment (1) as master in the service of the present owner of the vessel, and (2) as master of the vessel herself.	on original Survey, or Continuation, or Restoration, and of vessels not having an original character, which are found to be fit to carry dry and perishable goods. The term of years for which this character is assigned appears under the class in column 5 (Steamers), column 6 (Sailing
Decks.	See illustrations of types of vessels, following page xl of key. Explanations of such terms as Shade dk., &c., are included in the alphabetical key, see page xxviii.	Vessels), thus :SSPly-96-6yrs.  Æ1
8 dk rule	This notation indicates that the vessel has been built according to the Rules for three-decked vessels.	character Æ is assigned appears under the class in column 6 (Sailing Ships), thus:—SSPly.96-4yrs.
Special Surveys.	Explanations of records of special periodical surveys will be found in the alphabetical key, see page xxviii. The records only certify to the vessel's state of efficiency at the time of	1The figure 1 included with the characters, as printed above, signifies that the vessel is well and efficiently equipped as per Table 22 (see the Society's Rules).
Ports of Survey.	The contractions (such as Lon., Syd., &c.), used to denote the ports at which vessels have been surveyed, are explained at page xxxii.	—This sign placed after a character, in the position usually occupied by the figure 1, indicates that the equipment of the vessel—either as regards its quality or its quantity—does not fulfil the requirements of the Society's Rules.
Rig, &c.	Explanations of contractions used to denote the rigs of vessels will be found in the alphabetical key, see page xxviii.	4This sign denotes that the vessel has been built under Special Survey.
†	This sign following the word "salted" indicates that the vessel's beams have not been salted.	This sign denotes that the engines or the boilers, or both (according to the record which follows) have been built under Special Survey.
Steame Tonnage.	ers, column 4; Sailing Vessels, column 5.  The tonnage recorded in the Register Book in type like that shown at the side hereof, 1101 (Gross) is, with a few exceptions, the official registers (Tuber dt.)	A black line, with date underneath, indicates that the vessel's character was expunged from the Register Book at the date specified because from reported defects the vessel was not entitled to retain her classification.
	law of the country to which the vessel belongs.	a.se A red line, with date underneath, indicates that the vessel's character was expunged from the Register Book at the date specified because from non-compliance with the Society's Rules as regards surveys, the vessel was not entitled to retain her classification.
	For some foreign vessels, the tonnage which is recorded has been measured in accordance with British rules and is \$101 (Gross) accepted under British law. In such 1994 (Under dk.) cases, the fact is indicated by the use of	This sign in column 7 (Steamers), column 8 (Sailing Vessels), indicates that the vessel's class was withdrawn from the Register Book at the Owner's request.
Steamers.	italic figures, thus:— columns 5, 6 & 7; Sailing Vessels, columns 6, 7 & 8.	100.4.1When a posting of loss, condemnation, casualty, &c., is made against a classed vessel, the character is expunged in this manner.
	Symbols of Classification of Lloyd's Register.	soith freeboard This notation under the character signifies that the free- board assigned is a condition of the vessel's class.
90A1 85A	(Characters of vessels built of Iron or Steel according to the Rules of the Society since 1869. The numerals 100, 90, &c., do not signify terms of years, but are intended for the purpose of comparison only.	For tug pur- poses, Such notations under the character indicate the special poses, trade or purpose for which the vessel is intended and in Travoler, &c. view of which she has been classed by the Society.
	This character (without a numeral prefixed) is assigned to Iron or Steel vessels built for special purposes or trades, to the satisfaction of the Committee.	Asyng dk., See illustrations of types of vessels, following page xl of Shade dk., &c. key. Explanations of such terms as shade deck, awning deck, &c., are included in the alphabetical key to the abbreviations, see page xxviii.
<b>*</b> ▲1	Oharacter of Iron vessels built with thicker plating than required for A.	Symbols of Classification of the late Underwriters' Registry.
Al Al A	Characters of Iron vessels built according to the Rules of the Society in force between the years 1864 and 1871.	(Amalgamated with Lloyd's Register in 1888).
A1	Character of Wood or Composite vessels of the first class well and sufficiently equipped. The figures in column 5	A1, A1, Characters of Iron or Steel vessels built in excess of the Rules of the Underwriters' Registry and of extra quality of Iron.
	(Steamers), column 6 (Sailing Vessels), prefixed to the character indicate the term of years for which the vessel is at present classed, thus:—11A1, Cont 6A1, Rest 6A1.  (See notes in alphabetical less nego yvgiii nodes "Cont".	A1*, A1*, A1  Characters of Iron, Steel, or Composite vessels built according to the Rules of the Underwriters' Registry.
	(See notes in alphabetical key, page xxviii, under "Cont" and "Rest"). The figures in column 7 (Steamers), column 8 (Sailing Vessels) indicate the expired terms of years	Vessels classed in red were built under the inspection of the Surveyors to the Underwriters' Registry.
	originally assigned, if on the first line, and assigned on continuation if on lower lines.	The figure 1 or 2 affixed to Symbols of Classification signifies the Character of Equipment.
